C2. English translation of the Petition Chamoson-Chippis

"With the support of the commune of Grône, we are requesting the federal authorities and Swissgrid SA to reconsider the file on the Chamoson-Chippis high voltage power line. The project foresees installation of a pylon within a few dozen meters of the scholastic center in Grône where there are 700 children from different communes.

"We are concerned about the health of our children, some of whom will be spending more than 10 years exposed to an electromagnetic field. Childhood leukemia, insomnia, headaches, irritability, brain tumors... could be attributed to being close to such a power line. This is why the persons signing the petition are requesting placement of the line underground."
