Dr. Devra Davis: “Cell Phones and Brain Cancer”	
“How WiFi & other EMFs Cause Biological Harm”,	2014

Prof. Pall: „According to some governments, it is not possible for microwaves from mobile phones, WiFi, ‘smart’ meters, etc. to cause harm, that research in the field is inconsistent and that there is no proof that such radiation can cause health issues.“

According to the eminent physicist, geneticist and cell biologist, Prof. Emeritus Martin L. Pall, they are wrong on all counts.

In this video, Pall argues that research results showing harm are not “inconsistent” as is sometimes claimed, and that the health of the public now urgently needs to be protected. [see also](#) 2014
